

MASTER

Duplex slitter with a separate unwinding station

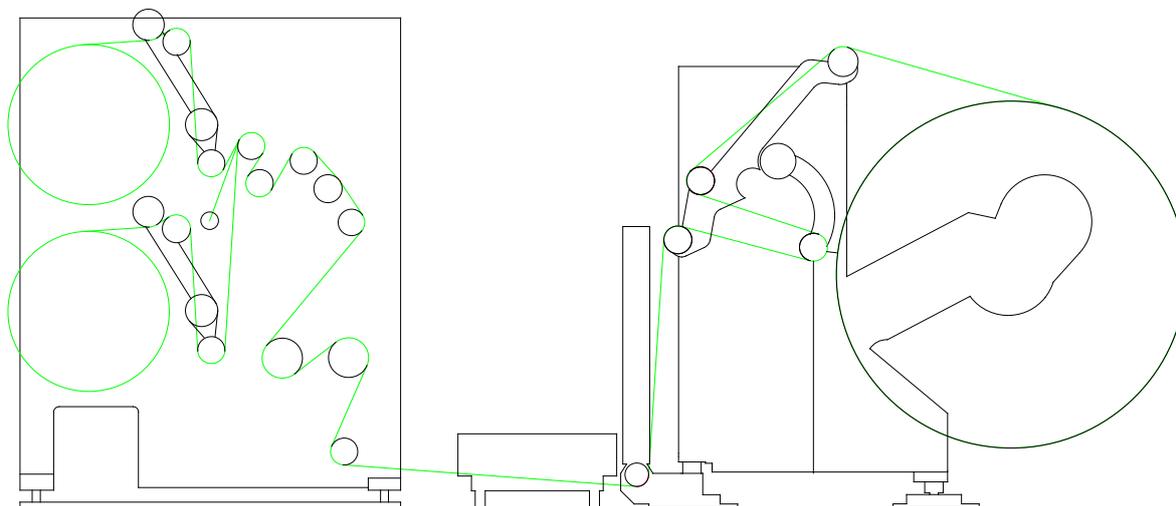

High performance machines for slitting and rewinding flexible materials with possibility to integrate punching / laser unit or Work Flow solutions

- Automatic knife setting
- Precise tension control
- Various handling solutions
- Advanced software solutions
- Work Flow possibilities
- 4.0 Industry concept

Web width	1000/2200mm	Unwind roll diameter	1300/1500mm
Min. web width	300mm	Unwind roll weight	2500kg
Min. slit width	50mm/25mm option	Rewind roll diameter	610/800/1000mm
Speed	800m/min	Core roll diameter	70mm, 3" / 6"

Processed materials: printed / unprinted foils (PE, PP, PA, PS, PET and other), paper, metalised films, laminates, labelstock films, alu films, non-woven.

MASTER slitter allows integration of a punching / laser device or Work Flow solutions. The machine is a combination of local engineering and high class German components. Its modular construction and advanced software solutions make it one of the most versatile models currently available on the market.

AVAILABLE EQUIPMENT:

- Duplex rewind
- Separate unwind station with top run of materials
- Supported shaftless unwind
- Eco-friendly built, incl. reduction of overall energy consumption
- Parent roll lifting
- Pneumatic splicing table to join the materials
- Web guiding system BST CLS Pro 600
- Automatic setting of rotary knives or razor blades
- Touch screen panel with memory
- Inbuilt trim vacuum system
- Automatic laser core positioning system
- Automatic pushing bar
- Automatic handling to unload finished reels
- Job monitoring
- Work Flow solution
