

-  automatic settings
-  energy savings
-  automatic tension control
-  speed: 500 m/min

LANGER47 New, perfect rewinder for inspection of wrap-around labels

LANGER4 main parameters:

Web width	450/600mm	Unwind roll diameter	800/1016mm
Min. web width	300mm	Unwind roll weight	300kg
Min. slit width	15mm	Rewind roll diameter	400/600mm
Speed	500m/min	Core roll diameter	from 1" to 6"

LANGER4 is a highly productive rewinder designated to slit and rewind tension sensitive linerless labels, self-adhesive labels, wrap around labels and other monofilms. With a proper configuration it can also handle pharma labels and aluminium films. Great mechanical engineering combined with advanced software solutions has resulted in a design to slit and inspect various types of labels.

The combination of an unrivalled high speed of 500m/min with energy saving solutions and a brake free operation results in unprecedented productivity with low maintenance costs.

MAIN FEATURES:

- Automatic settings
- Energy savings
- Automatic tension control
- Speed: 500 m/min
- Inspection camera or Work Flow systems
- Various slitting methods
- 1 or 2 rewinding stations or turret rewind
- Advanced touch screen panel with job memory
