

MASTER3 Duplex slitter with separate unwind and rewind station

MASTER3 main parameters:

Web width	1000/2200mm	Unwind roll diameter	1100/1500mm
Min. web width	300mm	Unwind roll weight	max. 2500kg
Min. slit width	15mm	Rewind roll diameter	600/1000mm
Speed	800m/min	Core roll diameter	from 70mm to 6"

MASTER3 slitter allows to slit efficiently various types of flexible materials. The precise tension control ensures perfect control over the slitting process which in combination with automatic solutions such as automatic knife setting, laser beam setting, web control or cores loading increases considerably the efficiency of slitting. Moreover, the energy saving solutions ensure constant saving over the years and reduce carbon footprint. The design of the machine allows to incorporate external devices such as a laser device, a punching unit, inspection solutions or an ink jet station which elevates the features of the machine.

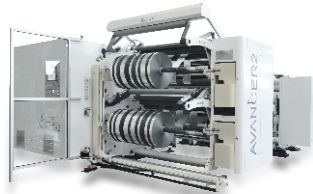

This universal model can be supplied in entry level version or in a fully automated one.

MAIN FEATURES:

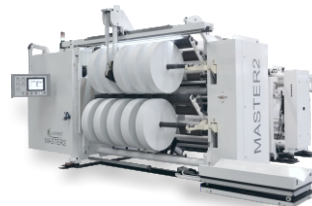

- Modular design with separate unwind and rewind station
- Eco-friendly built, with reduction of overall energy consumption
- User friendly 15" touch screen panel with memory
- Design in line with trends
- Advanced automatic solutions
- Smart Converting features
- Automatic knife setting
- 4.0 Industry solutions
